

HOFFMANN INC.

FABRICATION

steel [certified welders] [specialty alloy steel]
steel fabrication [A-36 carbon steel] [steel fabrication]
 [epoxies] [special preparation coatings] **galvanizing**
 [stainless steel] **carbon steel** [crane services]
 [plasma cutting] [sub-arc] [inspections] **steel stacks** [design and engineering]
platforms [steel fabrication] [A-36 carbon steel]
 [steel grit blast] **plate rolling** **aluminum** [epoxies]
 [installation] [Cor-Ten] [CNC facin roll] [steel stacks]
 [ALLtra] **specialty alloy steel** [single wall]
COR-TEN [mig] [tig] **ductwork** [steel stacks]
 [single part paint] [pandjiris]

STEEL FABRICATION

Hoffmann, Inc.'s state-of-the-art fabrication facility is a full-service, job shop specializing in heavy, steel fabrication. Our fabrication team can produce custom engineered fabrications and assemblies, as well as single parts and OEM weldments. Projects with electrical, plumbing, and hydraulic installation are routinely incorporated into our production process. With overhead crane heights of 36 ft. and 20 tons of capacity per crane, our fabrication facilities can handle the largest of projects.

Our registered engineers and drafting technicians have the experience to design for the industrial and manufacturing industries. Hoffmann's design team can provide professionally sealed prints, computer-aided drafting for all steel components, and 3-D modeling for prototype and fixture design.

Since 1986, Hoffmann has been designing, fabricating, and erecting steel stacks. Our expertise allows us to design and build a wide variety of configurations for domestic use or export. All of our stacks are engineered to meet ASME standards and other applicable codes.

Hoffmann also offers final assembly plus off-site fabrication, field erection, and installation throughout the U.S.

The safety and health of our employees and customers is our highest concern. Employees are routinely trained in OSHA regulations and Hoffmann's Safety Program is incorporated into our production methods.

*Delivery and transportation quotes upon request.
All welders are certified in AWS D1.1 for all positions.
AWS D1.6 stainless and API 650 available upon request.*

Materials

- Carbon Steel
- Stainless Steel
- COR-TEN Steel
- Aluminum
- Specialty Alloy Steel

Coatings

- Special preparation and coatings for temperatures up to 1000° F
- Steel Grit Blast
- Single Part Paint
- Epoxies
- Zinc
- Galvanizing
- Polishing

Industries Served

- Industrial
- Commercial
- Manufacturing
- Municipal
- Power and Energy
- Renewable Energy
- Grain Handling
